

# Basic Sphere Training for EMT doctorSHARE

## Overview:

The "Basic Sphere Training for EMT doctorSHARE" is a specialized training program designed to equip Emergency Medical Team (EMTs) with essential knowledge and skills in humanitarian response. This training is organized by doctorSHARE, a leading medical humanitarian organization in Indonesia, dedicated to improving healthcare access in underserved communities.

## Objective

The primary objective of the training is to familiarize EMTs with the Sphere standards, a globally recognized set of principles and minimum humanitarian standards that ensure quality and accountability in humanitarian response. By the end of the training, participants will be well-versed in applying these standards in various emergency settings, enhancing their capability to deliver effective and ethical medical care.

## Key Components

### 1. Introduction to Sphere Standards:

- Understanding the Sphere Project and its importance in humanitarian response.
- Detailed exploration of the Sphere Handbook and its practical applications.

### 2. Humanitarian Principles and Ethics:

- Emphasizing the core humanitarian principles: humanity, impartiality, neutrality, and independence.
- Discussing ethical dilemmas and decision-making in emergency medical settings.

### 3. Water Supply, Sanitation, and Hygiene Promotion (WASH):

- Ensuring safe water supply and sanitation facilities in emergency contexts.
- Promoting hygiene practices to prevent disease outbreaks.

### 4. Food Security and Nutrition:

- Assessing nutritional needs and delivering appropriate interventions.
- Understanding the impact of food security on overall health and well-being.

### 5. Shelter and Settlement:

- Providing safe and adequate shelter solutions for displaced populations.
- Planning and managing emergency settlements effectively.

### 6. Health Action:

- Delivering comprehensive healthcare services in emergencies.
- Coordinating with other humanitarian actors to ensure a holistic response.

### 7. Protection Principles:

- Safeguarding the rights and dignity of affected populations.
- Implementing measures to prevent and respond to protection risks.

## Methodology

The training employs a combination of interactive lectures, group discussions, case studies, and practical simulations. Participants will engage in hands-on activities that mimic real-life scenarios, allowing them to apply their learning in a controlled environment.

## Target Audience:

This training is designed for EMTs affiliated with doctorSHARE, as well as other medical professionals and humanitarian workers interested in enhancing their competencies in emergency response.

## Outcome:

Participants will emerge from the training with a robust understanding of the Sphere standards and their practical application in the field. They will be better prepared to respond to emergencies with a focus on quality, accountability, and the well-being of affected communities.

## Event Details

1. Date: 18-20 March 2024
2. Venue: Green Forest, Bogor, Indonesia
3. Duration: 3 days
4. Registration: please contact [rodexjs@gmail.com](mailto:rodexjs@gmail.com)
