

Fighting COVID-19 in Indonesia

Applying humanitarian standards
to the global COVID-19 response

Webinar | 25 June 2020 | 2pm Jakarta - 9am Geneva

Registration: bit.ly/sphere-covid-indonesia

In partnership with

...Welcome!

Melawan COVID-19 di Indonesia

Menerapkan standar kemanusiaan
untuk respons COVID-19 global

Webinar | 25 Juni 2020 | 2 siang Jakarta

Registrasi: bit.ly/sphere-covid-indonesia

In partnership with

...Selamat datang!

Some housekeeping rules...

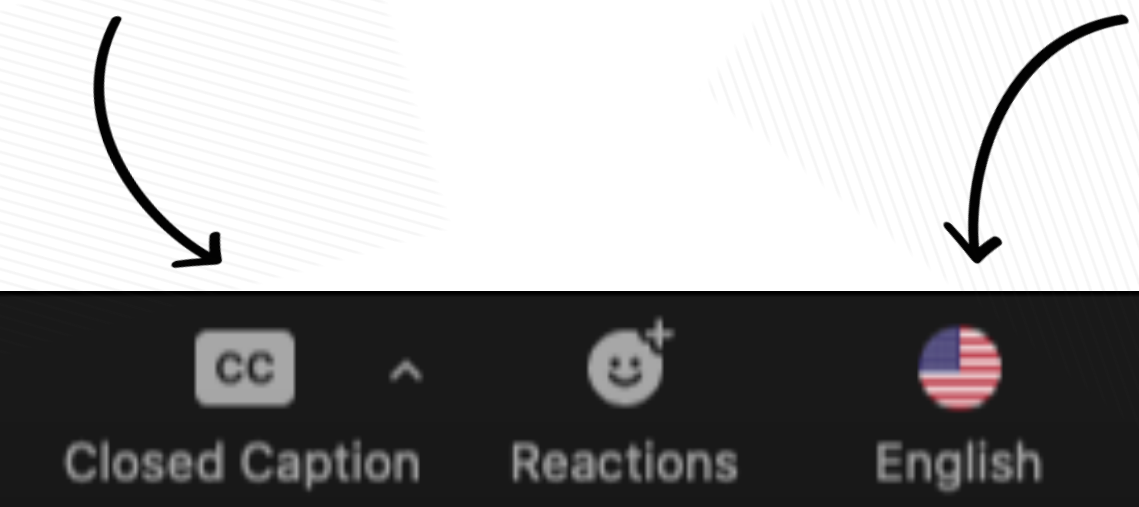

- Please mute your microphones 😊
- “Raise your hand” or write in the chat if you’d like to ask a question or need support. Rolf will monitor the chat.
- We will split into breakout rooms. (How does that work?)
- Tweeting about the webinar? Tag us as [@SpherePRO!](#)

**This webinar is being recorded
and the video will be posted online.
We will share the presentation, too.**

Accessibility

- We will **translate** to and from English / Bahasa Indonesia
- We are providing **live captions**
- We will translate into **sign language**

Objectives

- Explore a community-led response as an approach for humanitarian response
- Listen to and learn from members of a community, their experiences and their own approach
- Discover links between this particular community-led response and the Sphere Handbook

Meet the speakers

Axel Schmidt, facilitator
Arbeiter-Samariter-Bund e.V. (ASB)

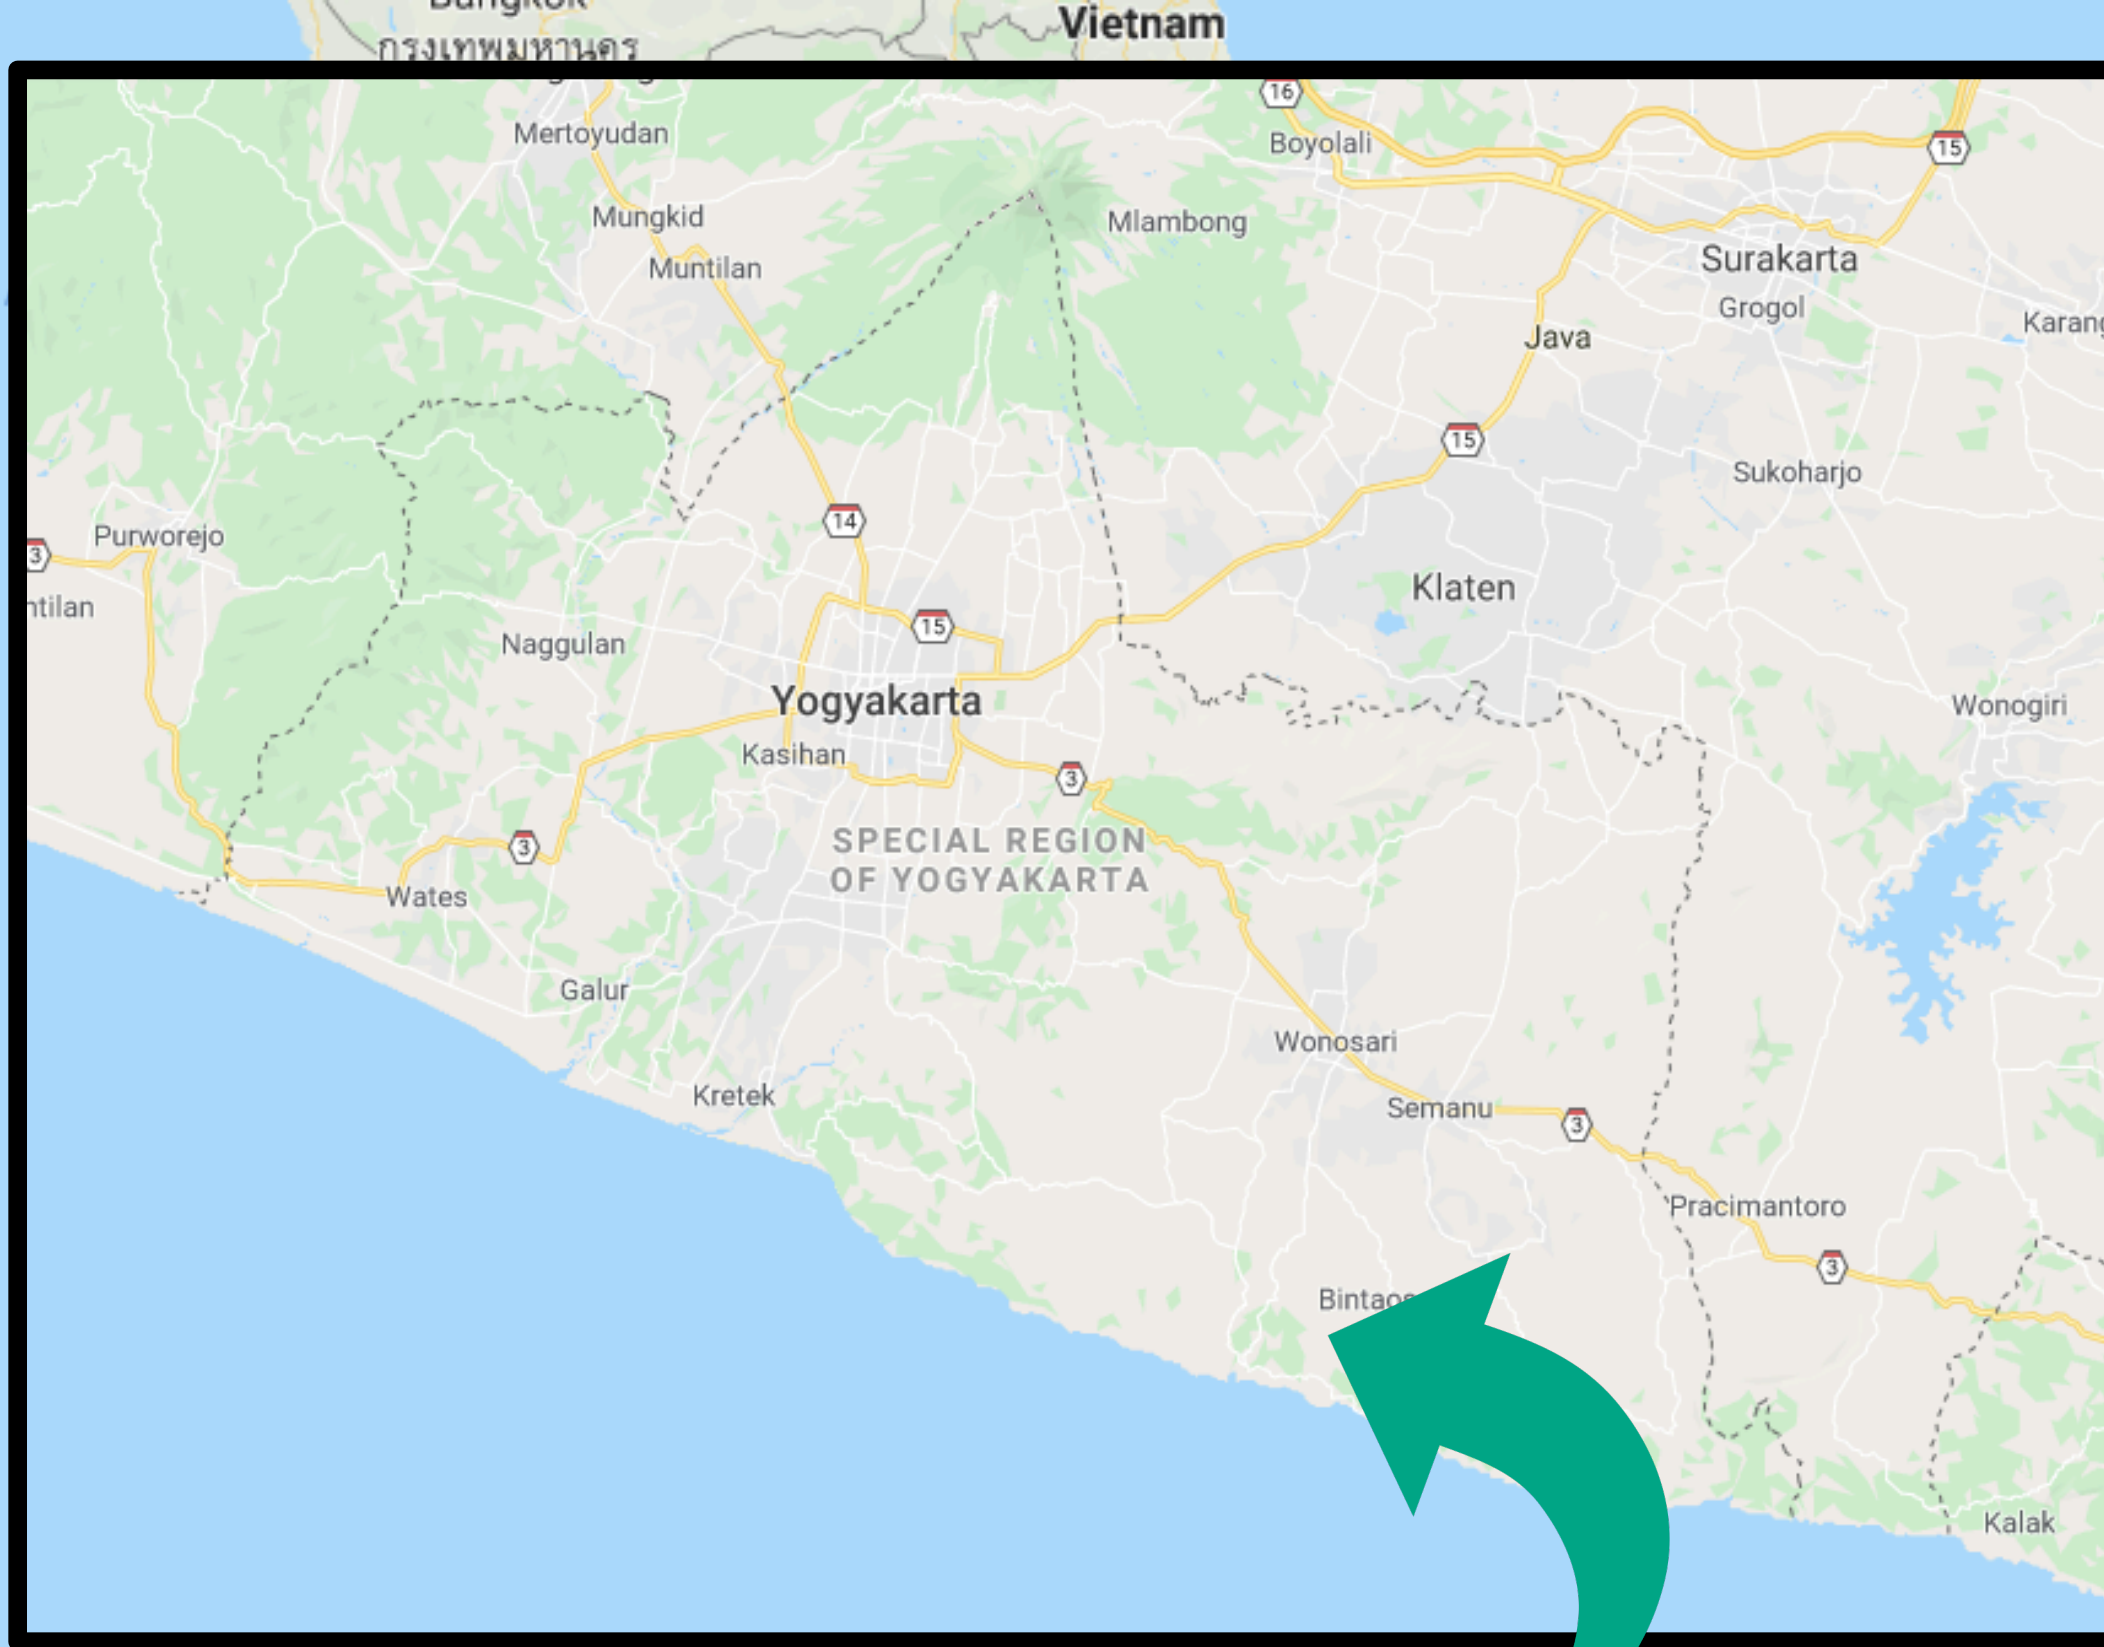

Aninia Nadig, co-facilitator
Policy and Practice Manager, Sphere

Veronica Oktik Lestari

Wisnu Isnawan

The Humanitarian Charter

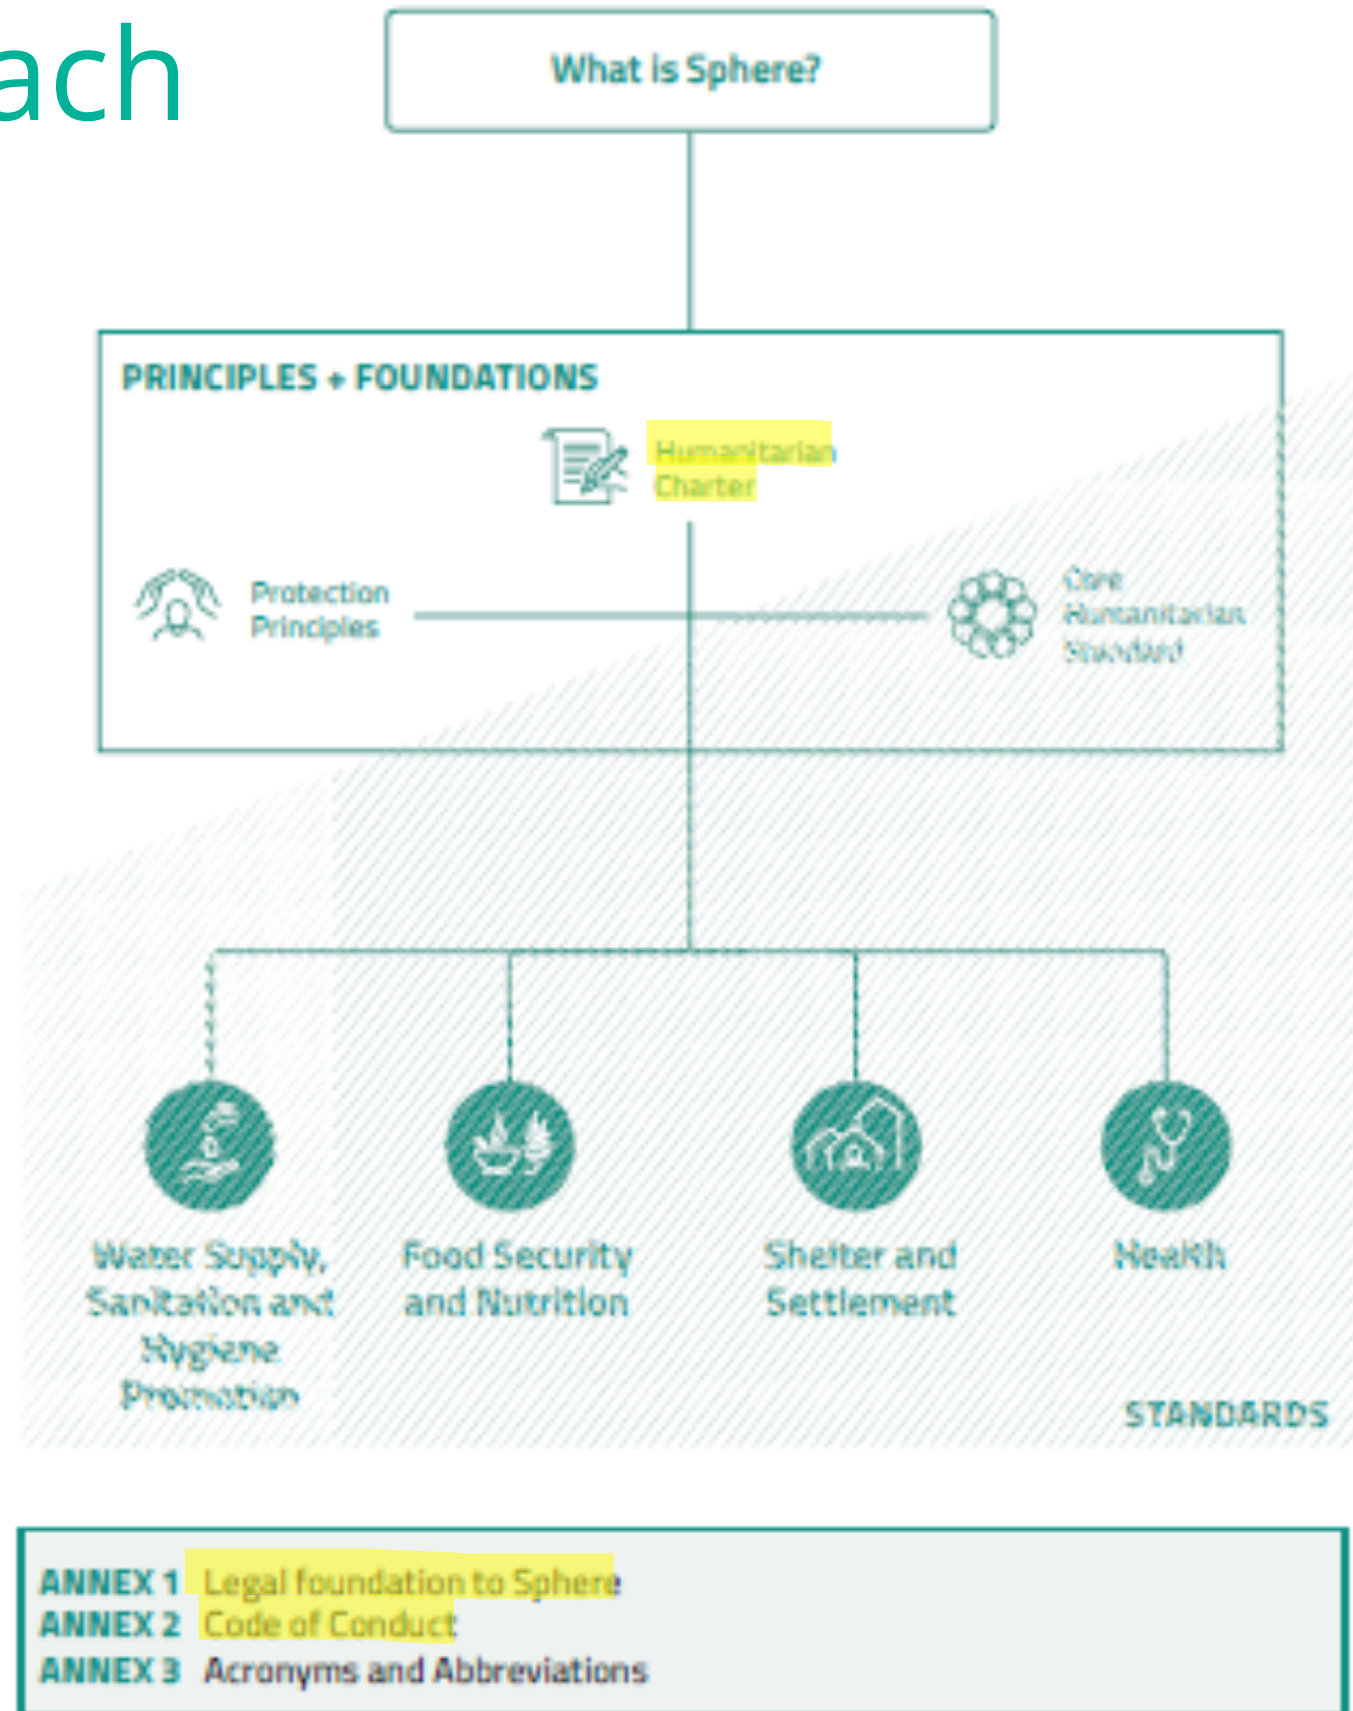

Sphere Project linked technical standards and rights of affected people («consumer rights»)

Standards based on international law and conventions

A holistic approach

Rights frame the
Sphere Handbook

Standards are
expressions of rights

The Code of Conduct: 10 Core Principles

1. The humanitarian imperative comes first.
2. Aid is given regardless of the race, creed or nationality of the recipients and without adverse distinction of any kind. Aid priorities are calculated on the basis of need alone.
3. Aid will not be used to further a particular political or religious standpoint.
4. We shall endeavour not to act as instruments of government foreign policy.
5. We shall respect culture and custom.
6. We shall attempt to build disaster response on local capacities.
7. Ways shall be found to involve programme beneficiaries in the management of relief aid.
8. Relief aid must strive to reduce future vulnerabilities to disaster as well as meeting basic needs.
9. We hold ourselves accountable to both those we seek to assist and those from whom we accept resources.
10. In our information, publicity and advertising activities, we shall recognise disaster victims as dignified human beings, not hopeless objects.

The Code of Conduct: Principles of Conduct for the International Red Cross and Red Crescent Movement and NGOs in Disaster Response Programmes for full text [⊕](#) see Annex 2

Protection Principles

1. **Do no harm**
Safety, dignity and rights
Protection risks, context analysis, the treatment of sensitive information
Community protection mechanisms
2. **Impartial access** to aid without discrimination
3. **Support to recovery** from violations
4. **Referral** to legal redress and support to strengthening the **protection environment**

Core Humanitarian Standard

- Voluntary code that describes the **essential elements** of principled, accountable and quality humanitarian action
- **People at the centre**
- **Nine Commitments** to people affected by crisis
- Link to **technical standards**

Sphere for Covid-19 response

- **Human dignity**

- → Humanitarian Charter, Code of Conduct, all of the Handbook

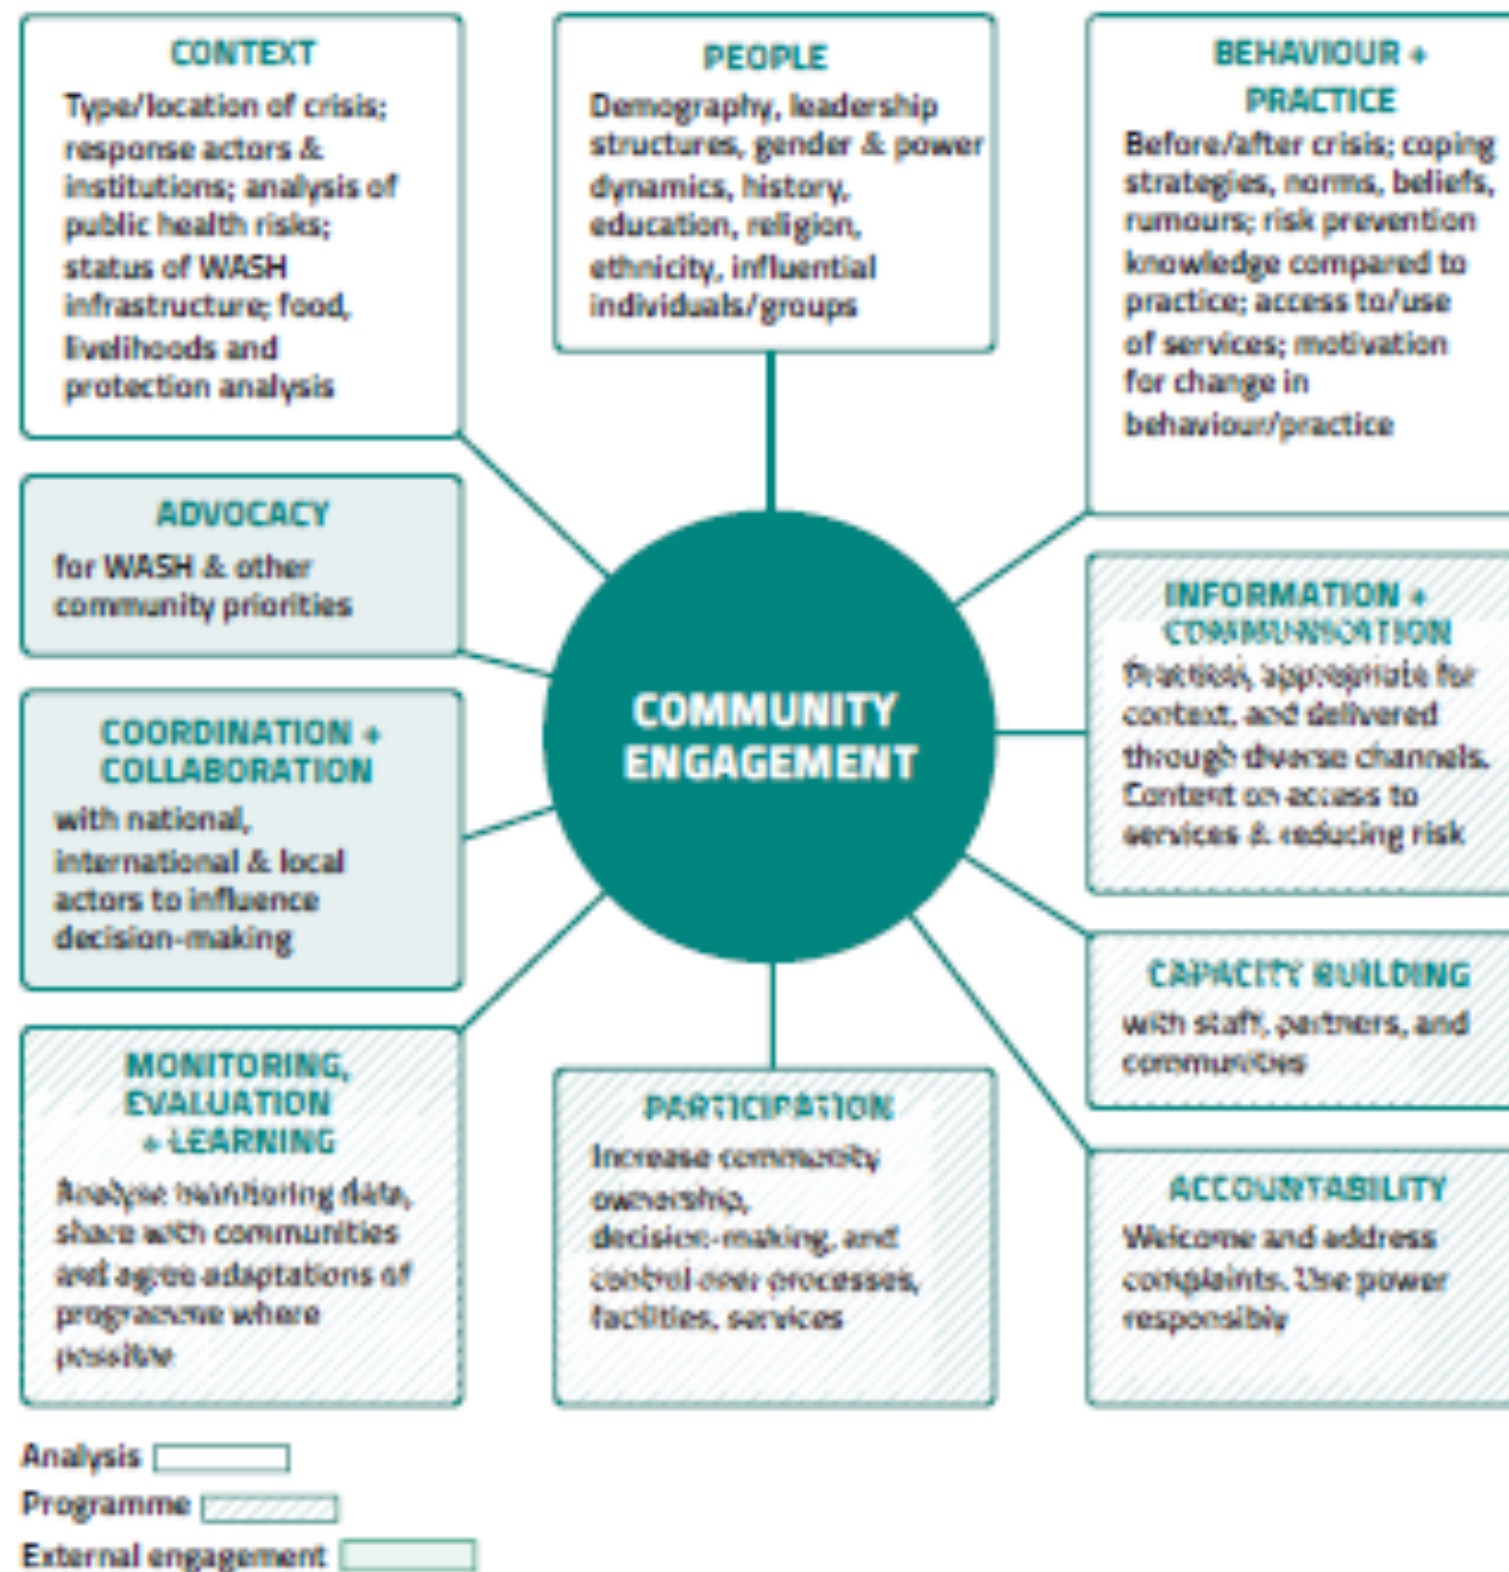

- **Community engagement**

- → WASH chapter (Hygiene promotion) and all of the Handbook

- **Other needs**

- → Health chapter – all technical chapters

Community engagement

WASH Community Engagement (Figure 4)

Community engagement in WASH

Hygiene promotion only works if people engage in it

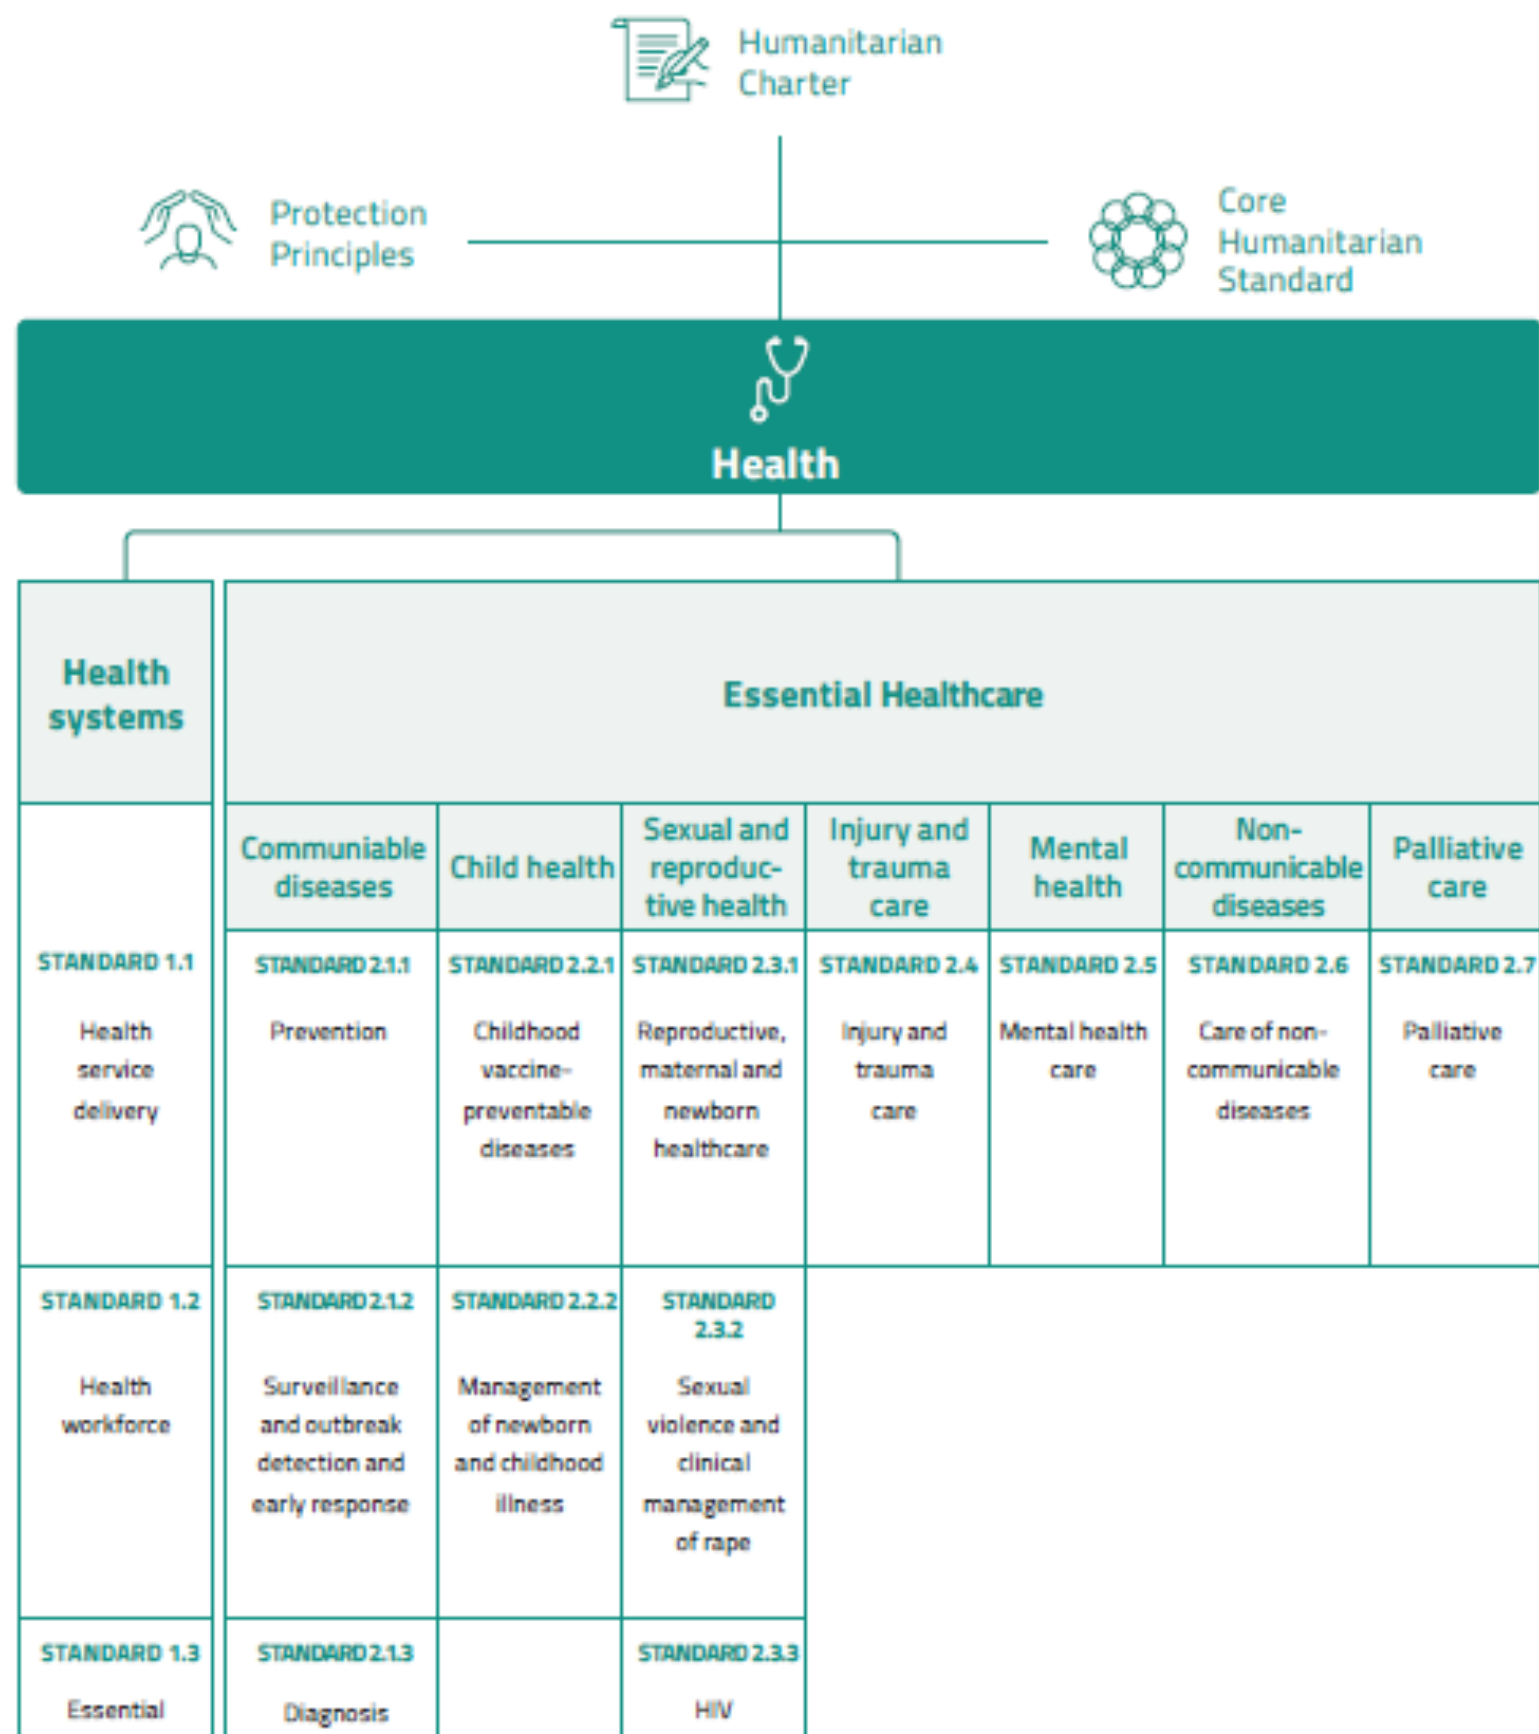

→ Hygiene promotion standards 1.1 to 1.3

WASH in disease outbreaks and healthcare settings → WASH standard 6

Community engagement remains a key component of outbreak response to prevent the spread of disease. Existing community perceptions and beliefs can support or hinder a response, so it is important to understand and address them.

Some social norms may need to be changed to prevent disease transmission. Example: handshaking

Health standards

Breakout rooms

How to make your next project/activity more people-centred, maybe with Sphere?

Questions & Answers

THANK YOU!
